Front-End web developer focusing on React development. As an ex-ship captain, I have great experience in team management and working in stressful conditions. Since I'm an improv theater player, I can create a positive impact in the projects with my creativity and high energy. I have a passion for creating beautiful and engaging websites.

TECHNICAL PROJECTS

It's on Us - [GitHub](#) | [Demo](#)

It's on us is a platform in which donors can donate food coupons to people in need from the chosen restaurants.

- + Worked with Gitflow workflow and Scrum methodology.
- + Programmed the local storage to store the data of cart items and make it persistent
- + Designed the project in Figma and used React/Ant Design to build the UI

Travel Bucket- [GitHub](#) | [Demo](#)

Board project is a board where users can add travel wishes with additional data

- + Implemented Google Firestore database to store user data
- + Model the data for creating, read, update and delete operations in the selected board items
- + Designed with MDBootstrap to use Google Material design system

Movie Heaven - [GitHub](#) | [Demo](#)

Movie Heaven is a project using MovieDB API, where it shows movies, their casts, ratings, trailers and genres.

- + Coded with Object-Oriented programming to achieve code reusability
- + Used MovieDB API to get the necessary movie data and show movies on the pages
- + Designed with Bootstrap CSS framework to make the page responsive
